

# BIRDS IN GREENSPACES

## Activity Pack (Sticker Book)

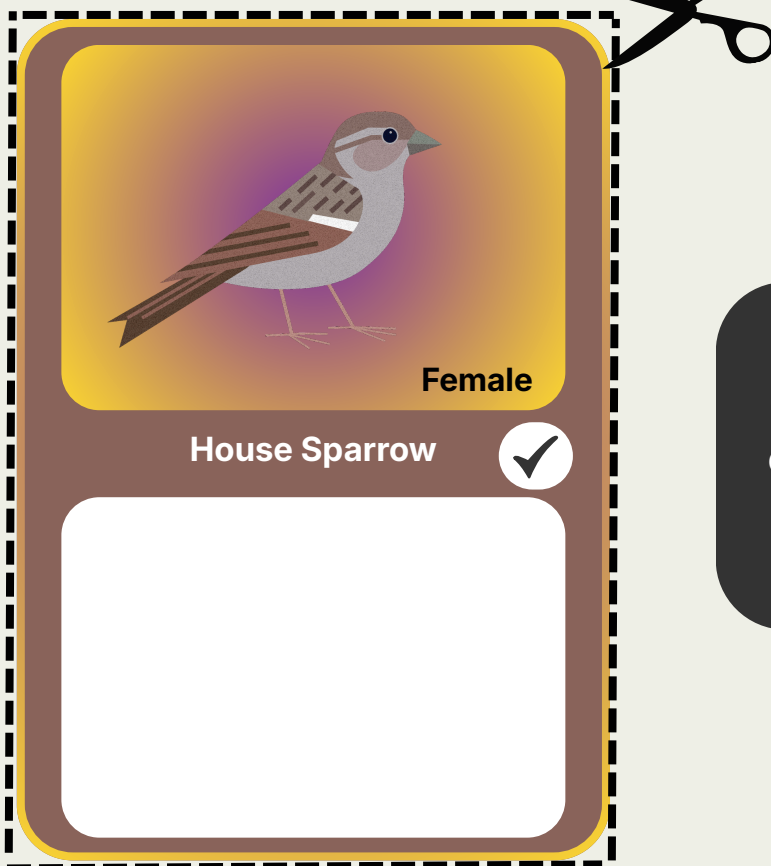

# Introduction

Welcome to the Birds in Greenspaces sticker book.

Inside you will find several different types of bird, with each individual species designed as a card.

In your other activity pack you will find 31 cards which you can stick into this sticker book once you have seen or heard them, taking part in the Birds in Greenspaces survey.

## Example

Once you have cut the card out, you can stick it in this book.

# Denis Summers-Smith

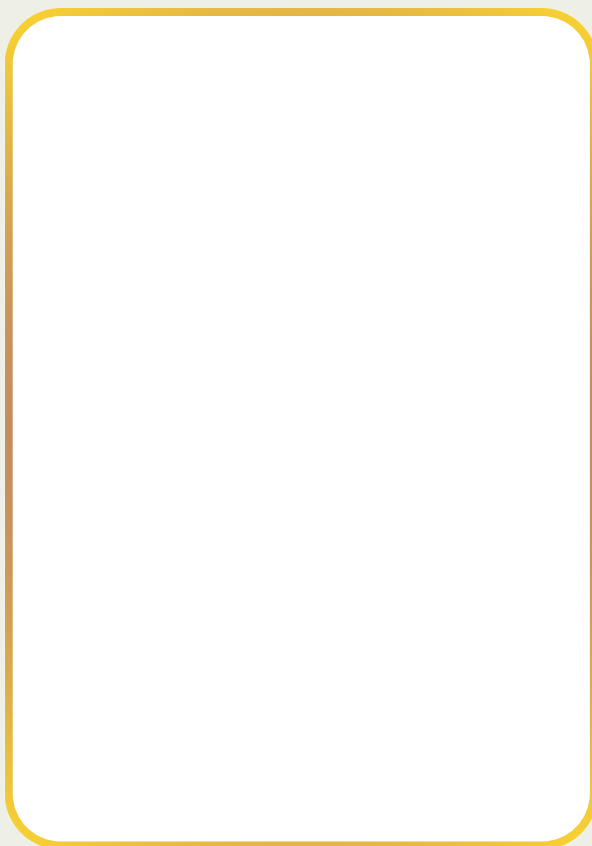

Denis Summers-Smith was an inspirational and influential natural historian whose work on the House Sparrow is famous worldwide. Although he held a PhD in Physics, his work on the House Sparrow won him many prizes including Stamford Raffles Prize of the Zoological Society of London.

Denis also wanted to see young people enter the field of natural history by making sure barriers and challenges they faced were tackled and removed. It is from a generous gift left by him that Birds in Greenspaces exists and we want to ensure our resources (including this pack) are as inclusive and accessible as possible.

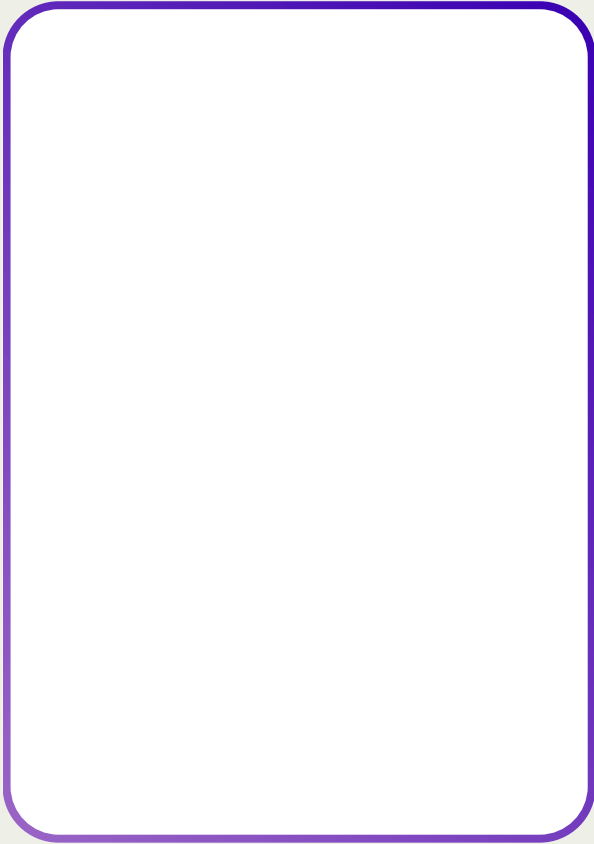

## The sparrow family

House Sparrow
