NEST RECORDING COVERAGE			
How much time did you spend in the field nest recording? Please indicate the extent of your observations for each month listed below. M = most days, F= a few days, 0 = no days.			
<i>Monthly coverage :</i>	MARCH		JULY
	APRIL		AUGUST
	MAY		SEPTEMBER
	JUNE		OCTOBER
NB: Some species may be found nesting throughout the year, eg. Collared Dove and House Sparrow, while in many others the season extends from March/April to August/September. Please make every effort to see the full season through.			

SPECIALIST STUDIES
We aim to gather true, unbiased breeding statistics for each species, which is why records are wanted for EVERY ACTIVELY OCCUPIED NEST EXAMINED, CONTAINING EGGS and/or YOUNG. If only selected records (eg. for successful nest, but not for failures) are sent to the BTO, this will produce misleading results when the cards are analysed. It is a great help when analysing cards to know which observers have concentrated on a particular species. If you have conducted any specialist studies this year and have seen and recorded every nesting attempt made on the nest record cards, please list the species concerned below:

SCHEDULE 1 SPECIES
If you have monitored the nests of species protected under Schedule 1 of the Wildlife & Countryside Act (1981) please record your Schedule 1 Licence Number here:

ARRANGING CARDS
Please arrange the cards for nests found in Britain and Ireland in alphabetical order by <u>species code</u> as on the list overleaf, and fill in the species totals. This allows us to speed up the card inputting process. Before returning the cards, please check for mistakes and omissions. Completed cards should be sent with this form to:
The Nest Record Scheme, The British Trust for Ornithology, The Nunnery, Thetford, Norfolk, IP24 2PU
