

Aesop's Fable Task

What You Need

- A tall jam jar or a large empty (clean) 500ml clear plastic bottle. Either needs to be narrow enough to prevent a bird reaching the food directly (~3cm)
- A wooden board (or similar)
- 10-15 small stones (1-2cm width)
- Glue & tape
- Food treats
- Water

What To Do

1. Cut the top half off the bottle and seal off the edge with tape.
2. Glue the jar or bottle onto a wooden board for stability.
3. Place board onto a bird table or other flat surface.
4. Collect some small stones and place by the jar/bottle.
5. Half fill the jar/bottle with water and place a food treat into the water.
6. Do any birds place stones into the water, continuing until they can reach the food?
