WADER HUB

Brown & Shepherd (1993). Survey Visit Cover Sheet. (attach survey maps(s) with date and name written on it).

Observer name:			Site name:		Site ref:
Date ((dd/mm/yy):		**Visit no.:**	**Start time (24-hr):**		**End time (24-hr):**

Cloud:
☐ 1 – Mainly clear (0–33%)
☐ 2 – Partly cloudy (34–66%)
☐ 3 – Mainly cloudy (67–100%)

Wind:
☐ 1 – Calm
☐ 2 – Light
☐ 3 – Breezy

Rain:
☐ 1 – None
☐ 2 – Drizzle
☐ 3 – Showers

Visibility:
☐ 1 – Good
☐ 2 – Moderate
☐ 3 – Poor

1-km grid squares visited (if known/applicable).

Waders observed (name of species). If >8 species encountered, use Notes field.	Adult counts			Pair count	Chick count	Notes:
	Total count	Total displaying	Total alarm-calling/with young	Estimated pairs	Total chicks	
Species 1 ( )						
Species 2 ( )						
Species 3 ( )						
Species 4 ( )						
Species 5 ( )						
Species 6 ( )						
Species 7 ( )						
Species 8 ( )						

Wader two-letter codes and symbols:
Note CU (Curlew) used as e.g. below, but symbols apply to all species.

CU – Curlew	**DN** – Dunlin	**GP** – Golden Plover	**L.** – Lapwing
OC – Oystercatcher	**RK** – Redshank	**SN** – Snipe	**CS** – Common Sandpiper

CU	Curlew recorded **not** displaying, repeatedly alarm-calling or with young	(CU)	Displaying/singing Curlew
<u>CU</u>	Repeatedly alarm-calling (agitated) and/or 'mobbing' Curlew	**CU + juv(3)**	Adult with three chicks (juveniles)

If multiple adults are observed in one location, write the number before the two-letter code (e.g. 7L. = Seven Lapwings in a field) - this can be used with any of the symbols noted above (e.g. 3<u>RK</u> = three Redshanks repeatedly alarm calling)

Draw the route walked with a dashed line and arrows to indicate direction ------→ ------→ ------→ ------→
